

We are back!!!

GRADE 10!!!

Today's agenda

- Team introduction
- The LinC STEM Program pipeline
- Survey
- Chronogram of this year activities
- Instagram + web page
- Three activities : 1) Drawing
2) Games
3) Teaser of next week labs
- A new outreach opportunity
- Goodbye

TEAM 2025/2026

Scientific Mentor
Ally Fernandez

Ally is an undergraduate student at UTSC, studying biology. She makes all the videos for the project.

Fun Fact:
She likes to plan really elaborate birthday parties.

Scientific Mentor
Thiago Caixeta

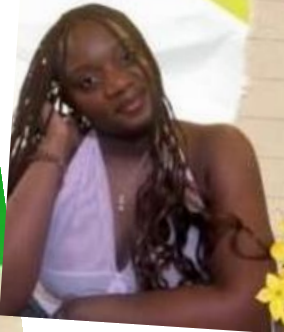

Thiago is an international student at UTSC, doing Biology, Geology and Theatre. He is also the one managing this Instagram page!

Fun Fact:
He is interested in exobiology and would love to do a research in that field #hireme

Scientific Mentor
Modupe Olunuga

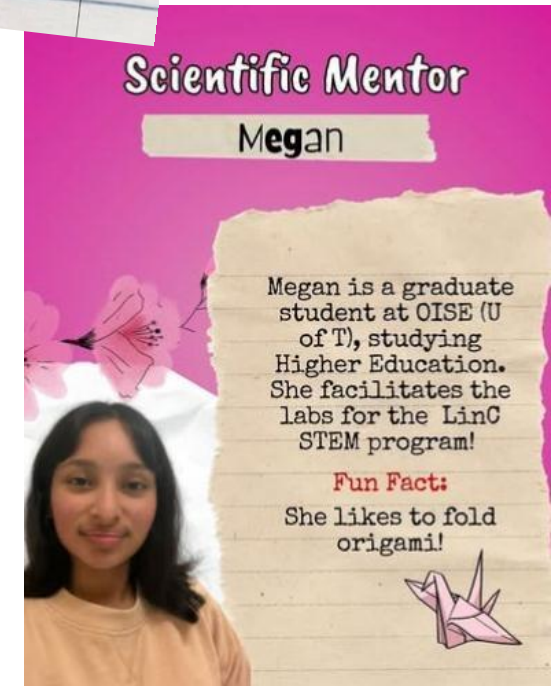

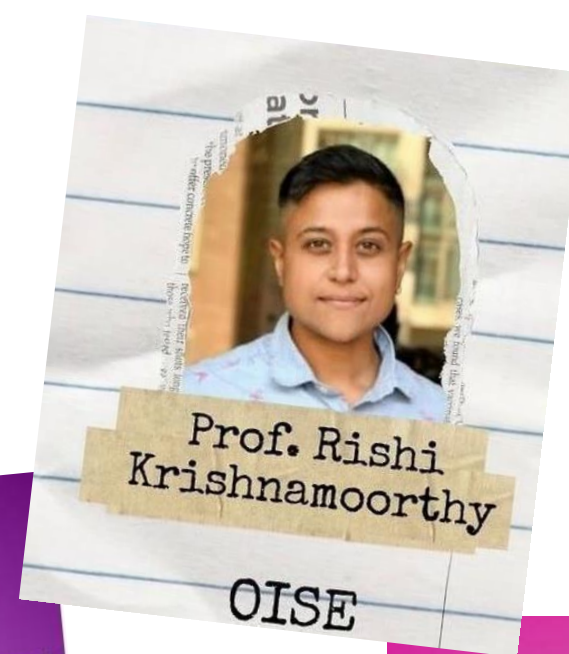

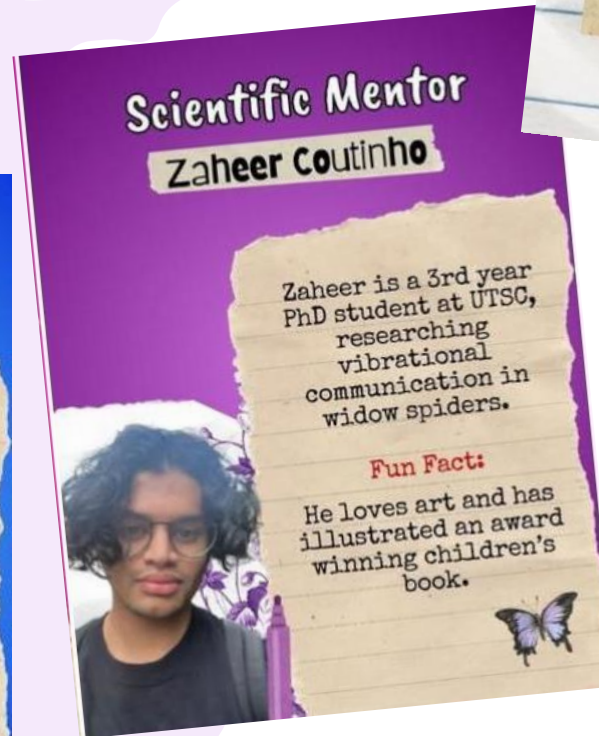

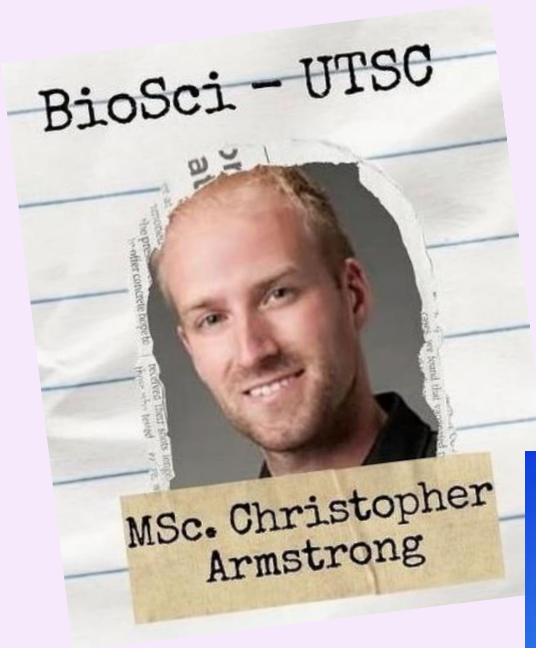

Modupe is an international student at UTSC, studying biochemistry. She helps facilitate the labs and workshops for the students.

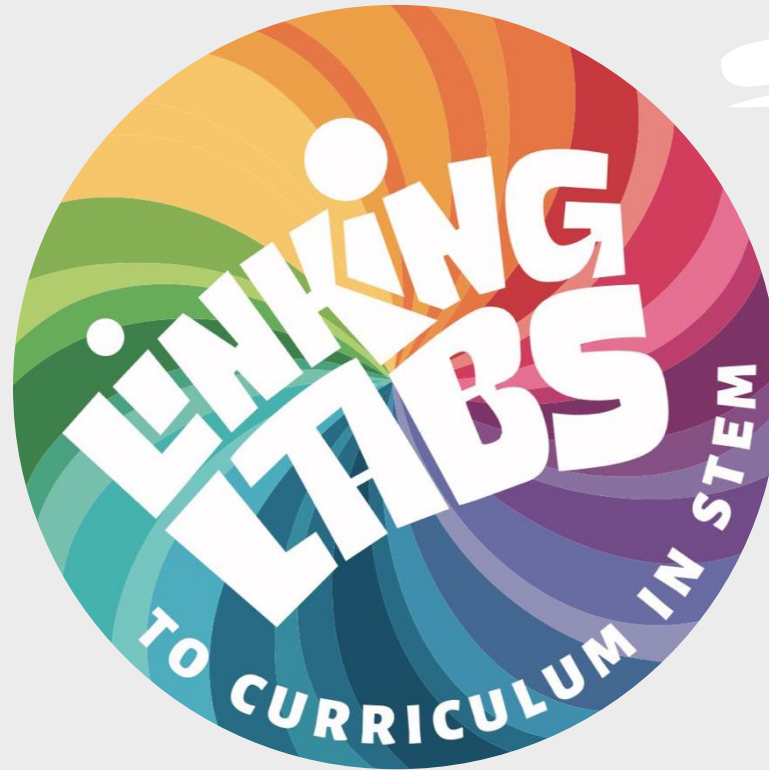

Fun Fact:
She loves dogs and has 7 pet Rottweilers!

NEW MEMBERS 2025/2026

What set LinC STEM apart, and why it matters ?

The LinC STEM Program Pipeline

The LinC STEM Program

Intentionally built (structure, activities & materials) **to support your science learning and practice** through your Grade 10 Biology STEM curriculum

Scientists facilitate and develop all the materials (presentations, protocols, videos) and **activities** (workshop, experiments)

Sustained by limited funding and yearly competitive grants

Access Strategy & Partnerships Office
OFFICE OF THE VICE-PROVOST, STUDENTS

Relies on your engagement and feedback to continue for future students

The LinC STEM Program

Relies on your engagement and feedback to continue for future students

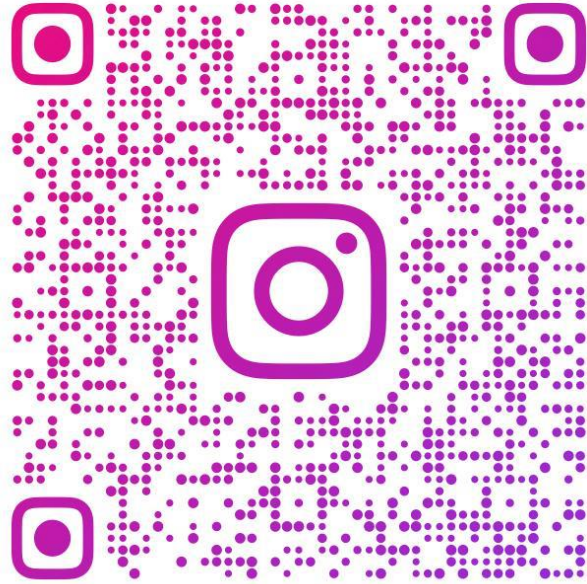

Survey at the beginning and end of the program

Your view about the program matters to us!!

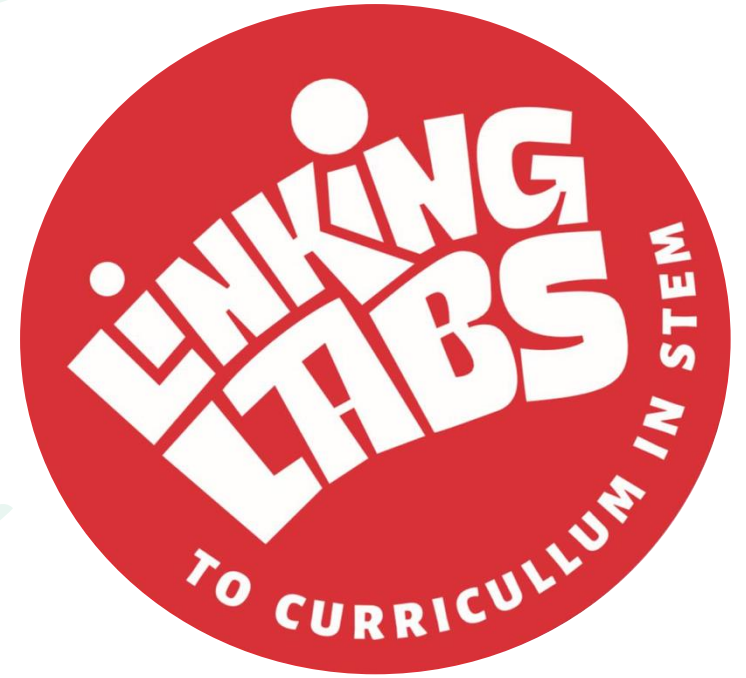

Your view about the program help us to make it better and to secure more funding

Activities

First Activity

Drawing

Draw a picture of a scientist

Your picture should explain:

What does a scientist look like?

What does a scientist do?

Welcome to the Laboratory and Safety around the lab

Program agenda

Activities at UTSC

February 23/24th

BioSci Labs

- 1) Scientific method recap
- 2) Mitosis
- 3) Pipetting practicing

March 9/10th

BioSci Labs

- 1) PCR

March 30/31th

BioSci Labs

- 1) PCR
- 2) Tasting lab

April 7/8th

BioSci Labs

- 1) Diving response

Activities in the classroom

March 13th

- Classroom
- Data analyses

April TBD

- Classroom
- Data analyses

April TBD

- Classroom
- Importance of diverse representation in science

May TBD

- Classroom
- Reflection about your experience in the program
